About

Test Equipment for Pump and Centrifugal Breather

Test Equipment for Pump and Centrifugal Breather is designed for initial testing and preservation of oil unit pump, scavenge pumps and centrifugal breather of aero engine.

Technical Details

Technical Specifications		
S.no.	Name of Characteristic	Value of Characteristic
1	Working fluid	Turbonycoil 321 Density (at 20 °C) :875 kg/m ³ Viscosity (at 50 °C) :8 CST Flashpoint : 145 °C
2	Temperature of working fluid (°C)	65 to 80
4	Max. Working pressure of fluid (Kgf/cm ²)	6
5	Fineness of filtration (microns)	16 (min)
Electrical AC power supply to rig		
6	Phase	3 φ
7	Voltage	415 V ±10%
8	Frequency	50±1 Hz

Application

Test Equipment for Pump and Centrifugal Breather is designed for initial testing and preservation of oil unit pump, scavenge pumps and centrifugal breather of aero engine.

Key Features

Test Equipment for Pump and Centrifugal Breather is designed for initial testing and preservation of oil unit pump, scavenge pumps and centrifugal breather of aero engine.
